Summary

I am an Artificial Intelligence undergraduate with practical experience in developing real-world computer vision systems and deploying them on embedded hardware. I have worked extensively on training and deploying custom object detection models using YOLO and integrating them with Raspberry Pi for autonomous decision-making applications. My work focuses on building complete AI solutions — from dataset preparation and model training to real-time deployment and hardware integration. I am particularly interested in applied AI, computer vision, and building scalable intelligent systems that solve real-world problems.

Skill

Programming Languages: Python, SQL

Deep Learning: Convolutional Neural Networks (CNN), YOLO object detection, transfer learning, custom model training, TensorFlow, Keras

Computer Vision: OpenCV, image preprocessing, dataset annotation, real-time object detection, camera integration

Libraries and Tools: NumPy, Pandas, Matplotlib, Scikit-learn, Google Colab, Git, GitHub

Embedded AI and Hardware: Raspberry Pi 4, camera module integration, IoT **Generative AI and Emerging Technologies:** Prompt engineering, understanding of LLM-based applications, AI workflow design **Soft Skill:** Leadership, Problem Solving, Strategic Thinking, Team Work, Adaptability

Projects

Smart AI Waste Segregation System using YOLO and Raspberry Pi

- Developed an intelligent waste segregation prototype capable of automatically identifying and sorting waste using computer vision and embedded hardware.
- Collected and prepared waste image datasets and trained a custom YOLO model for object detection.
- Integrated the trained model with Raspberry Pi and camera module to enable real-time waste classification.

Jarvis – AI Voice Assistant using Python

- Developed a personal voice assistant capable of understanding voice commands and performing real-time tasks through speech interaction.
- Built a voice-controlled assistant using Python with speech recognition and text-to-speech capabilities
- Integrated speech recognition to process user voice commands and convert them into executable system actions

Education

B.Tech in Artificial Intelligence (2027)

St. Vincent Pallotti College of Engineering and Technology, Nagpur CGPA: 8.44 / 10

Certifications & Achievements

- President – AI Prabodha Student Forum
- Secretary & Founding Member – AI Prabodha Student Forum
- Class Representative (Last 2.5 Years)
- Introduction to Machine Learning – NPTEL
- 3rd Prize – National Level RoboSumo Competition, BITS Goa
- Fundamentals of Deep Learning – NVIDIA
